An ISO 9001:2015 Certified Company

THE POWER TO SWITCH  
ON YOUR WORLD

1947

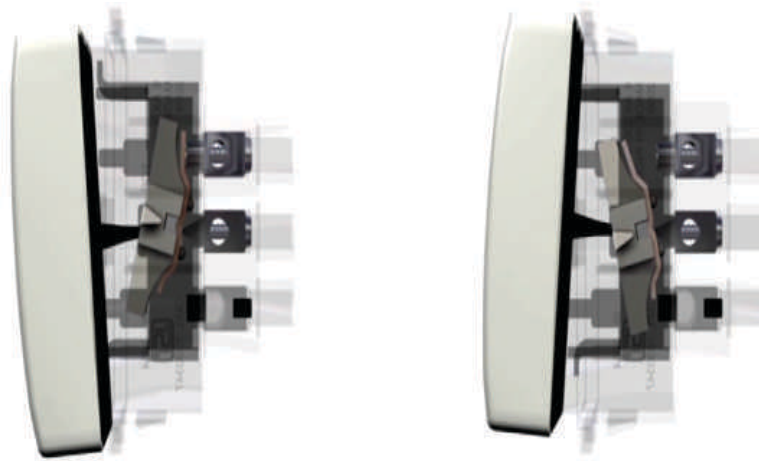

# a switch that lives on forever

a promise for life and beyond.

## First Leaf Spring Switch In the World

see-saw oscillation mechanism

**CPL Flirt** Line of Switches are manufactured using an innovative proprietary mechanism called the see-saw oscillating system. Mimicking a child's see-saw, simple pressure on one side of the switch results in soft and smooth make and break of contact on the other end. This mechanism uses a special steel alloy leaf spring having high tensile and anti-corrosive properties.

For its electrical contacts, it uses a revolutionary copper and silver cadmium inlay strip for better conductivity and durability. This spring and inlay is sandwiched in a High tension nylon holder offering high resistance to heat by shielding the spring from any wear and tear during the operation of the switch.

This system allows the switch to undergo 2,00,000 operations as opposed to 40,000 operations suggested by ISI. This makes Flirt the most durable switch in the world and allows us to offer life time warranty on 6 Amp Switches.

The line between  
elegance and eternity.

Beyond the charm and sophistication, beyond your walls and dreams they're built with, beyond the hope and infinite realms that a home can offer, beyond the elegance, finesse and meticulous finish, beyond everything that a switch is meant for and can ever mean lies **CPL Flirt**.

**Switch on the experience that never fades away. Ever.**
